

Permit with introductory note

The Environmental Permitting (England & Wales) Regulations 2016

Kuusakoski Limited

Crown Works
Faraday Road
Sheffield
S9 3XZ

Permit number
EPR/EB3455TQ

Permit number EPR/EB3455TQ

Introductory note

This introductory note does not form a part of this permit

This environmental permit authorises the operator to keep radioactive material and accumulate radioactive waste that is identified by a radiation detection system following its unintentional receipt and, after it has subsequently been characterised and quantified, to dispose of radioactive waste by transfer to operators who are permitted to receive and dispose of radioactive waste of that type and quantity.

When radioactive material or radioactive waste is found, the Environment Agency's aim is that it should be brought under a system of control as soon as possible. We expect operators of radiation detection systems to provide safe and secure storage for any discovered radioactive material or radioactive waste while it is assessed and an appropriate course of action is determined. This is intended to ensure that people and the environment are protected from the harmful effects of radiation.

The Health and Safety Executive regulates work with ionising radiation under the Ionising Radiation Regulations 1999 (being revised). Those regulations cover accidents and contingency arrangements, including off-site effects. The Office for Nuclear Regulation regulates transport of radioactive substances.
